What comes to your mind?

1920: No clear regulations

Today's traffic would be inconceivable

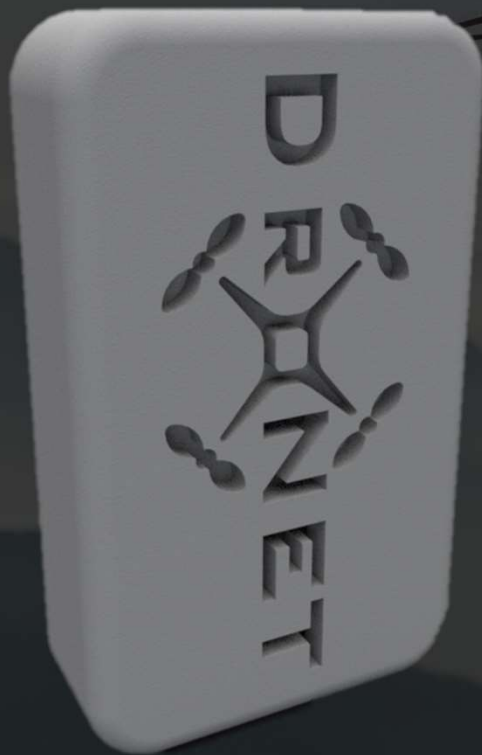

Problem: Drone Traffic

- **100** years later, same problem
- Need a safe, efficient and secure access to airspace
- **U-space**: regulations and framework of services
- **D-flight**: Italian NRI service provider

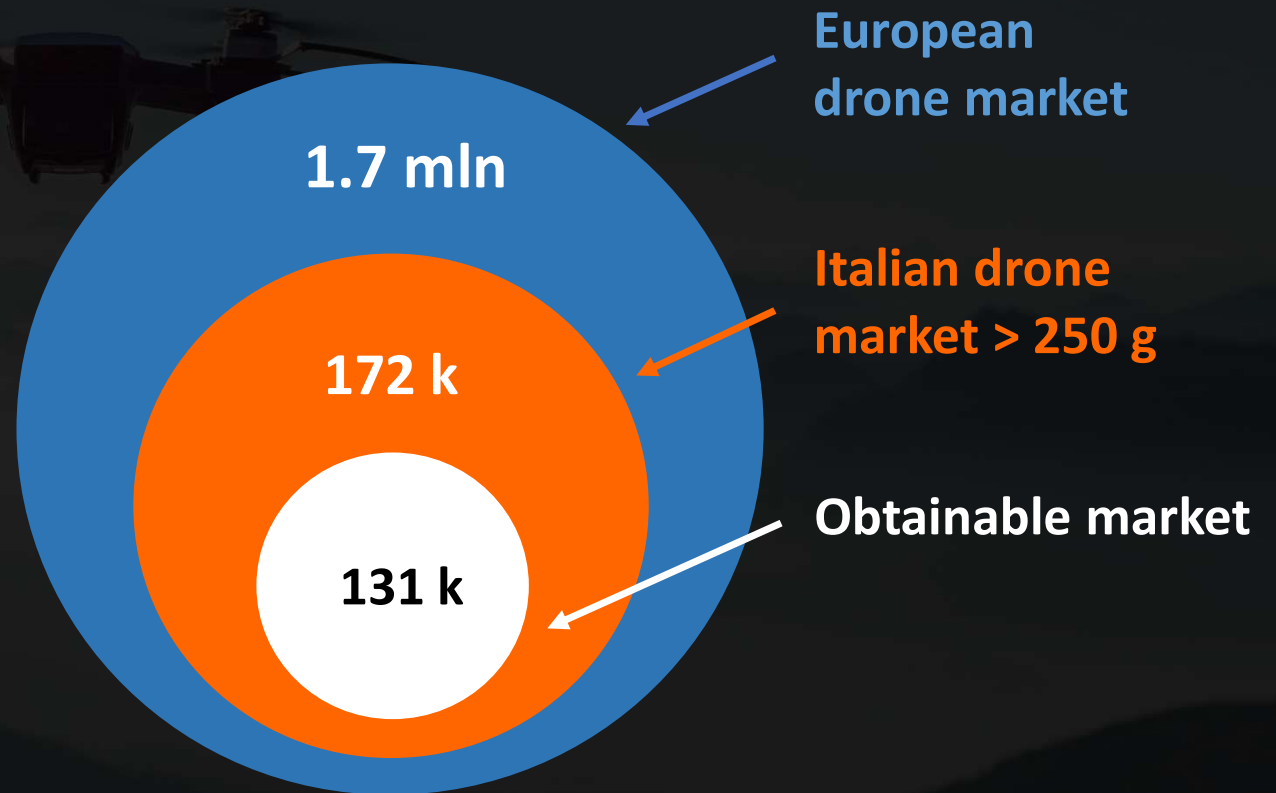

Solution: DroNET U-box

- Just switch it on and fly!
- Based on D-Flight ICD
- Easiest way to comply with the regulations
- Compatible with all drones on the market
- Ultra-small and feather-light device

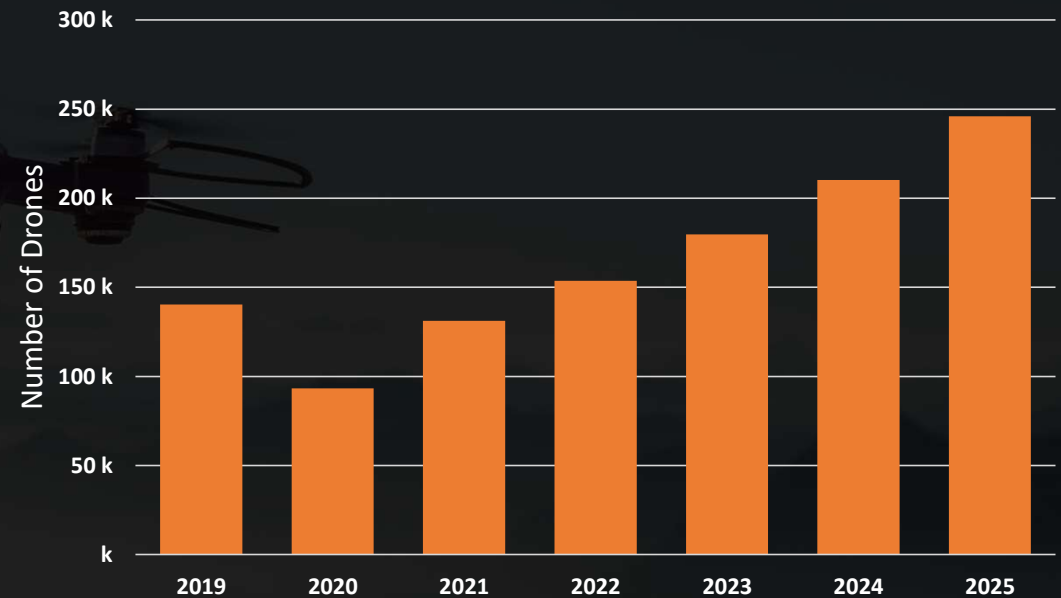

- Configure it on your browser
- Hook it on the drone
- Turn it on
- Fly your drone

Market Analysis

Market Analysis

Serviceable Obtainable Market (SOM)

- 2021-2025 CAGR = 17%
- Conservative results:
New regulations will allow the creation of a new market for drone services

What do we offer?

- Network Remote ID, mandatory in the near future
- Access to U-Space services
- Surrounding traffic awareness through D-Flight platform
- To facilitate BVLOS operations

Points of difference

- Ease of use
- Software flexibility
- Automatic update
- Time advantage

Summary

- NRI regulatory obligation
- Customer benefits
- Low initial investment
- Technical feasibility
- Target a large and growing market
